

Study programme: PATHOLOGICAL ANATOMY AND FORENSIC MEDICINE

ANNOTATION

The field of pathological anatomy relates to the etiopathogenesis and morphological manifestation of diseases. It also focuses on the study of pathological changes at cellular and molecular levels, and utilizes modern imaging methods of transmission and raster electron microscopy, immunohistochemistry, immunocytochemistry and molecular biology.

Forensic medicine and medical law is a branch of science that deals with analysing, explaining and answering questions of medical and biological character and helps to resolve the factual and evidentiary issues for the needs of the law and health care.
