

Microbiology exam in the summer examination period

- Microbiology examination dates are scheduled from 01. 06. to 14. 09. 2020 and are available in STAG.
- In Czech study programmes General Medicine and Dentistry, a face-to-face examination will be preferred and an online examination will only be allowed in exceptional cases (based on prior arrangement via e-mail). An on-line exam must be arranged at least three days prior to the exam.
- In English study programmes General Medicine and Dentistry exams can be carried out face-to-face as well as online. Student has the right to choose a preferred form of the exam. Prior arrangement via email is necessary for online exams and must be done at least three days before the exam.
- An online exam will be done in form of 20-30 minute conversation between the examiner and the student. The examiner will ask questions and immediate response will be expected. If the student does not know the answer or his/her answer is insufficient, next question will be asked straight away. At least three areas from the following fields of microbiology will be discussed – general microbiology, bacteriology, virology, mycology and clinical microbiology (specific antimicrobial treatment of infectious diseases).
- For students who will be tested online, the practical part of the exam will be substituted by an interpretation of microbiological results
- Software solution is to be specified (most probably ZOOM)
- The following rules must be adhered to in case of a face-to-face exam:
 - student must not have any no acute health problems that would suggest a viral infectious disease (e.g. fever, cough, shortness of breath, sudden loss of taste or smell, etc.)
 - hand sanitizer must be used when entering the examination room
 - student has not been ordered to be quarantined
 - student will provide a declaration that he/she is not experiencing any symptoms of a viral infectious disease
