Botucatu Medical School – Unesp, Brazil, had its Local Committee on Internationalization and its Department of Infectious Diseases teamed up to offer a Virtual Winter School in July 2022. This program will be held over two-weeks starting on July 04th.

Similarly to the in-person edition, this two-week virtual program will introduce medical students from around the world to topics of Tropical Diseases by learning the daily routines at wards and participating in the discussion of individual case studies. Students will also explore our Medical School, Botucatu City and Brazil by attending remote cultural activities.

Registration at: <http://bit.do/winterschool>
