## Services

### Loan services and returning of documents

Palacký University Library provides in-house use for studying in the library and also loan services for studying outside of the library. Charge out services are limited to students of Palacký University, employees of university and other categories of users (eg. Graduates). Teachers and doctoral students participating in teaching can borrow even in-house use documents. As a library card works your ID card (ISIC).

## Remote access to the electronic resources

If you are outside the university you can access to the electronic information resources by these means:

### VPN (Virtual Private Network)

VPN provides access to all resources that a student or university employee has access to, such as when connected to a UPOL network.

It is necessary to set up (install) a VPN connection on your computer once, then use the access addresses to resources as in the UPOL network.

Please use the guide [Access to the computer network via VPN](#) for setting this connection on your computer.

### Shibboleth

Shibboleth does not require any special settings on your computer, it will only connect to resources that Shibboleth supports.

This connection is realized by logging in to the provider's site (links [Sign In](#) / [Institutional Login](#) / [Shibboleth](#) etc.), using the identifying data valid for the Portal UP web. For more information see the [Shibboleth](#) page.

**Resources with Shibboleth access**

### EZproxy

It is a simple connection via special EZproxy links, which are generated directly for individual resources by the Portal of electronic information resources.

Each resource listed here on the portal has its own EZproxy link on its page, in the section "Additional Information", see [more here](#).

## How you can join the Palacký University computer network?

2 types of networks:

### 1. EDUROAM network

Instructions for use can be found at:

[https://wiki.upol.cz/upwiki/Pristup\\_k\\_pocitacove\\_siti/en](https://wiki.upol.cz/upwiki/Pristup_k_pocitacove_siti/en)

→ setup instructions for Android, IOS, Windows, Mac...

Username (uživatelské jméno) = **your portal ID**

Password (heslo) = **a code assigned by the University**

### 2. UPOL WIFI network

You can find currently valid password after logging in to <http://portal.upol.cz> in the section **Help/Helpdesk**.

WIFI is not available for all databases. (license)
