

WINTER SCHOOL

TROPICAL AND INFECTIOUS DISEASES

JULY 29TH - AUGUST 16TH
2024

INTRODUCTION

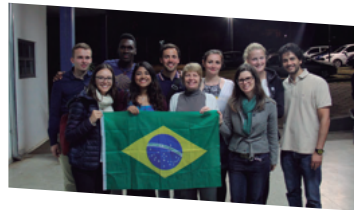

In this three-week program at UNESP Medical School in Botucatu, Brazil, medical students from around the world will be introduced to topics related to Tropical and Infectious Diseases by accompanying patients, learning the daily routines, participating in discussion of case studies in small groups, and getting to know the day-to-day ways on the wards.

TOPICS

- Health Surveillance (Epidemiological surveillance)
- Infection control in the Tropics
- Malaria
- Leishmaniasis
- Hansen's disease
- Paracoccidioidomycosis
- Dengue/Yellow fever/Chikungunya/Zika
- HIV
- Ophidic accident registration

PRATICAL ACTIVITIES/VISITS:

- Wards/ambulatories (including patient's discussions)
- "Instituto Lauro de Souza Lima" in Bauru (Hansen's Disease Hospital)
- "Domingos Alves Meira" Hospital (Day-hospital for HIV)
- Microbiology labs
- CEVAP (Center for the Study of Venoms and Venomous Animals)
- Biotechnology Institute (IBTEC)
